GENERAL INFORMATION

Business Name

The name Bunifu Technologies Limited was chosen from the Kiswahili word “**Ubunifu**” , meaning to be **innovative**. This reflected on what the founders stood for; to innovate and be a leader in providing innovative IT solutions in the market.

Brief History

Bunifu Technologies Ltd is a **software development** firm founded in the year 2011 and incorporated in the year 2014. The company, courtesy of its Developer Tools (.NET UI Framework) has grown exponentially and created value for thousands of developers and companies in over 140 countries.

Company Description

Bunifu Technologies Ltd. provides developer tools for .NET software developers and companies globally through its key product Bunifu Framework. The product helps developers create modern and stunning software interfaces and user experience. The company has also ventured in school transport processes automation industry. The cloud solution - Bunifu Go empowers schools to run an efficient and orderly transport system with real-time tracking and notifications to parents/guardians hence giving them a peace of mind.
